Tail Lift - Winter Checks

Your Tail Lift is more likely to break down in cold weather.

For many people, keeping on top of your tail lifts maintenance isn't always the number one priority - especially if you have a busy schedule.

That's where we come in, our fully-trained mobile tail lift engineers will attend to your site and will give your tail lift the complete winter checks to ensure it's set for the coming months and avoid some of the most common winter Tail Lift faults.

Our engineers will cast their expert eyes over the key areas of your tail lift, to make sure it's safe and set-up for winter. They'll also top up your fluids, analyse the performance of your tail lift, and report where necessary

On completing the winter checks the engineer will carry out a **FREE TAIL LIFT LOLER** including lubrication and level checks, including any minor adjustments.

Login to your Black Country Chamber account to view the offer code

check price - £91.50+vat

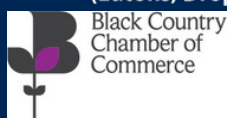

Don't get caught out this winter! Book your Winter Check and get a free tail lift LOLER.
