

Complimentary Cyber Security Audit

WORTH £600

Exclusive to BCCC Members

Identify cyber risks before they
become costly incidents.

Exclusive BCCC Members Offer

“ Cyber threats are no longer just an IT issue; they are a business risk that can impact operations, finances, customer trust, and compliance. ”

The BCCC and Concero Technology have partnered to provide an exclusive Cyber Eyesight Report for business leaders across the UK.

➔ **Normally priced at £600 + VAT, this report is available completely free for BCCC members for a limited time.**

Concero Technology Services

About Concerro Technology Services

Concerro Technology Services

“ We leave things better than we found them – always. We’re a people focused organisation who love technology, but people come first. ”

ONE TEAM. EVERY SKILL.

Small businesses often worry about relying on one IT person. When you work with Concerro, you gain access to a full team of specialists with expertise across cyber security, infrastructure, cloud solutions, networking, and digital transformation.

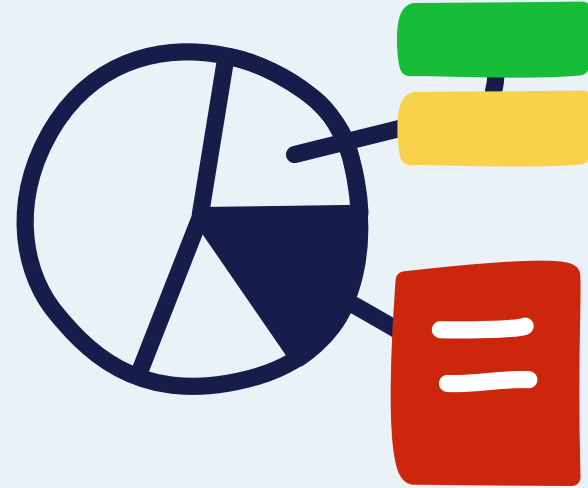

Because real IT support isn't just about technology. It's about people.

What is the Cyber Eyesight Report?

The Cyber Eyesight Report compiles publicly available information, including insights from the dark web, to identify potential cyber security risks associated with your organisation. The report provides:

- External cyber exposure analysis
- Vulnerability identification
- Dark web intelligence checks
- RAG-rated risk overview
- Executive summary and recommendations

Why organisations must prioritise cyber security audits

Cyber security is now a core business responsibility. In the past 12 months, 50% of UK businesses reported experiencing a cyber attack or security breach (UK Government Cyber Security Breaches Survey 2024).

Severe Financial Loss

UK businesses that experienced a breach reported average recovery costs ranging from thousands to tens of thousands of pounds, particularly following ransomware incidents.

Operational Disruption

Cyber attacks can halt systems, lock access to critical files, interrupt customer services, and significantly impact productivity.

Reputational Damage

Data breaches can damage customer confidence, impact partnerships, and weaken brand reputation long after an incident occurs.

Why Cyber Audits Are Imperative

CYBER SECURITY AUDITS ARE NOT SOLELY AN IT EXERCISE – THEY ARE A STRATEGIC BUSINESS NECESSITY THAT PROTECTS THE ENTIRE ORGANISATION.

Regular cyber audits help organisations to:

- **Identify Weaknesses Early** – Detect vulnerabilities before attackers exploit them.
- **Support Compliance** – Strengthen alignment with GDPR, Cyber Essentials, and industry security standards.
- **Maintain Business Continuity** – Reduce downtime and minimise the impact of ransomware or system failures.
- **Build Stakeholder Confidence** – Demonstrate to customers, employees, and partners that cyber security is taken seriously.

The Cost of Inaction

“ WITHOUT VISIBILITY OF EXTERNAL CYBER RISKS, VULNERABILITIES CAN REMAIN UNDETECTED UNTIL IT IS TOO LATE. ”

The Cyber Eyesight Report helps organisations:

**Understand
cyber exposure**

Prioritise risks

Improve resilience

**Strengthen
cyber awareness**
