PROFESSIONAL JOURNEY

Black Country
Chamber of
Commerce

blackcountrytraining.co.uk

In order for the region to remain competitive and thrive we need great and dynamic managers. Often, I hear that those who find themselves in management positions or elevated to leadership roles in businesses feel that they've missed out on essential training which allows them to be effective and deliver success for themselves and their business.

Over the last few years, the Black Country Chamber of Commerce has been working with Lotus Flower Consulting in order to help those individuals who want to challenge themselves, develop new insights, explore different approaches and share an invaluable development experience.

During this period, we have helped **many** businesses whose managers have taken this learning back into their business and applied it to how they navigate the challenges, embrace the opportunities and help their teams and businesses to grow.

This level of training is an invaluable investment in professional development which adds a real impact to individual businesses and, with a waiting list for attendees for each programme, remains a popular standard by which regional businesses expect their managers to be operating at.

Sarah Moorhouse, CEO
Black Country Chamber of Commerce

About our programme Trainer

Wendyanne Shapiro leads Lotus Flower Consulting and has been designing and delivering these Masterclasses for the Black Country since 2015 – providing a challenging yet supportive learning environment, where like-minded individuals can take time 'out' of the business to develop themselves. The sessions combine theory and content from schools of business with practical and experiential activities.

Specialising in organisational design, leadership and management development, Lotus Flower Consulting work with small and medium sized businesses operating in varied industries and sectors as a trusted partner and have clients across the globe.

“

I've been delighted to work with so many groups over the years. Each of the programme's cohorts create a whole new dynamic, with new thinking and new challenges. It's this that keeps the material and its relevance current and fresh. The measure of success has been witnessing individual growth on this learning journey and has been captured by some incredible results both personally and professionally. We want to share 'the best kept secret' for Management in the West Midlands and this should be considered a mandatory development programme for all businesses, no matter what size.

Unleash your potential

Over the last few years, the Black Country Chamber has welcomed **100s** of delegates from **industry leading** organisations who have taken on the Management Development Programme.

MANAGEMENT DEVELOPMENT PROGRAMME

The programme is designed to build a comprehensive toolkit which can be used by participants who are either in a management role currently or are aiming to be in a management position in the future.

Providing insights, techniques and tools; the programme gives participants the time and space to challenge their own ways of working, improve overall performance and develop approaches which add value to their business.

PROGRAMME CONTENT

The programme can be completed as a 12-month learning journey to create a holistic and immersive development experience.

As a new option to the programme, each module can also be taken individually in order to focus on the learner's specific development needs.

We recommended taking the full course to gain the full benefits of the Programme.

IDEAL FOR

The Programme has been developed based upon an analysis of business needs and what is needed for managers to deliver success to those businesses.

This programme is the perfect development companion for:

- New managers or those about to become managers
- Managers of systems or process
- Managers of people and teams
- Experienced managers who want to develop core competencies
- Experienced managers who want to tap into new thinking and approaches
- Managers delivering change management within their business
- Managers seeking new ways to drive efficiency and performance

*Each module
can be taken
individually*

Module title	Module learning outcomes
What is a Manager? Introduction to management and the manager's role	• Share experiences on current management and discuss & identify the qualities, skills and/or attributes of a 'Good' Manager • Reflect on your own approach, review management models and review and evaluate the effectiveness of your approach over time • Reflect on resilience levels and consider coping strategies
Using your time effectively and efficiently	• Recognise and identify personal motivation to manage your time and focus • View time management analysis methods and techniques such as planning, prioritising, prime-time, delegating etc. • Develop an action plan to apply and develop learning
Communication and delivery of the right messages at the right times	• Learn about communication components and review common causes of breakdown in the workplace • Learn how a cycle will help to build understanding and resolve problems quickly • Experience a range of techniques and tools to enable you to communicate assertively
Styles and dynamics which create a good team	• Define motivation, how it can be affected and complete a motivational outcomes questionnaire to identify your top 3 drivers • Understand team dynamics, develop strategies for conflict and examine how the Four Skills States affects performance • Review a typical Employee Life Cycle and discuss environments which can enhance motivation
Getting the most from meetings	• Analysis the effectiveness of your own meetings and understand the entire process of meetings to ensure it is productive and value driven • Define roles played in effective meetings and evaluate your conflict style • Take part in activities using techniques and tools to help manage group dynamics
Delivering a great presentation which gets the right results	• Develop a toolkit of skills and techniques to make a lasting impact when presenting ideas and information • Gain tips and techniques to help plan, prepare and deliver compelling presentations • Learn and test out practical strategies to deal with nerves in a positive way

MANAGEMENT DEVELOPMENT PROGRAMME CONTINUED...

Building commercial awareness and acumen	• Learn to describe business and personal perspectives on Commercial Awareness and understand key terms • Explore tools and frameworks to analyse your business • Engage in a new business venture activity, including planning and presenting • Identify and commit to a personal 'development' plan for the next 6 months	
Preparation and successful management of change	• Discuss and share change in business and consider the agility of your organisation • Understand the seven stages of change and discuss the impact it can have in the workplace • Develop strategies, evaluate change management models and identify opportunities to innovate and apply a 'thinking' approach for implementation	
Stakeholder and relationship mapping and management	• Define and learn key techniques to identify stakeholders and their priority places • Engage in activity to understand stakeholder drivers and perspective • Consider how to develop a stakeholder engagement strategy in line with organisation objectives	
How to run and deliver a project well	• Clarify the purpose and principles of project management and review roles and responsibilities • Build a project business case and identify key stakeholders and critical relationships • Demonstrate effective project planning and identify best practice	
Getting the best from your team and helping them to perform better	• Share your experience of Performance Management and understand how performance measures are a key requirement for organisations • Identify issues which affect performance and methods for help and support • Understand the difference between a disciplinary and a grievance and learn to use a variety of models to give positive and developmental feedback	
Coach and develop your teams and people	• Consider development aims for the next 6 months which include reflection on this Programme's learning outcomes • Discuss coaching, the value it can bring, the coaching cycle and the core skills required for coaching and self-evaluation • Experience a real-life 'coaching' conversation and revisit programme workshops via a group storyboard

INVEST IN YOUR FUTURE

Taking the full course means you experience the full benefits of the programme and continued learning. We also have easy finance options to help you split the investment. Contact our team to find out how we can help you.

TESTIMONIAL

“

We had appointed two new partners and felt that they would benefit from training to develop their leadership skills. After reviewing the Chamber offering, and having direct conversations with the friendly team, plus clients who had also put staff through the course, we decided that this was the route we wanted to go down.

Personally, I have noticed a change in how the new partners manage their teams and how much more confident they are in making decisions.

I feel the courses offered by the Chamber are comprehensive whilst being affordable and can equip employees with the skills to improve both their own performance and that of the firm as a whole.

Wendy Davies | Partner
CK Chartered Accountants

”

TESTIMONIAL

“

I have a greater appreciation of team dynamics and how to best allocate tasks to match the skill sets held within the teams. The course has instilled greater levels of self-confidence and made me much more commercially aware.

In addition, the business I work for has benefitted from the fresh ideas and best practice I have discovered.

I would thoroughly recommend this programme because it is enlightening, practical and relevant to any industry or working environment.
