ABOUT QES

The Black Country Quarterly Economic Survey Snapshot gives an up-to-date picture of the performance of the Black Country business community.

The figures in this report have been informed from quarterly economic surveys conducted by the Black Country Chamber of Commerce. The surveying period for the Q2 2025 Quarterly Economic Survey took place between 12 May and 5 June 2025.

National QES results can be found on British Chambers of Commerce website [here](#).

As the most authoritative national business confidence survey, and the first to be published in each quarter, the results of this survey are closely watched by both HM Treasury and the Bank of England's Monetary Policy Committee and help to inform decisions that impact upon interest rates and business policy.

The survey itself has reliably anticipated the onset of the two recessions since the early 1990s before they began and continues to act as a reliable indicator of national and regional economic performance. The Black Country Chamber of Commerce uses the results of the survey to inform upon detailed economic performance and trends throughout the local region and beyond.
